## BRANDALAN FLOOR CARE SYSTEMS: NEW SOLUTIONS TO FLOOR CARE MAINTENANCE

**B**randalan, Incorporated introduces its full line of floor care maintenance products. Each product is designed with the latest in polymer technology, resulting in floor finishes that provide superior gloss, durability and ease of maintenance. The Brandalan Floor Care System program includes:

**Novabrite** – Our best selling floor finish, Novabrite is a 25% solid sealer/finish that provides outstanding performance in any type of facility and on most any type of surface. Its excellent combination of high initial gloss, outstanding durability and ease of maintenance makes it ideal for those seeking a versatile floor finish.

**XP-008** – Designed for retail and other high profile applications, XP-008 is number one for burnish response and gloss build, while still retaining the labor saving durability for which all Brandalan products are known.

**Marathon** – If you are looking for a floor finish that's tough, look no further than Marathon. Marathon is designed for the toughest floor finish applications, where heavy traffic or limited maintenance affects the floor care program. Use Marathon in day care centers, industrial facilities, and convenience stores and you'll soon see the difference.

**Balance Neutral Cleaner** – A special blend of cleansers allows Balance to clean your newly finished floor effectively without removing the shine. Balance is also an excellent cleaner for your marble, granite and other natural stone surfaces.

**Renaissance Restorer** – Enhance the gloss and restore the life of your worn floor finish with Renaissance restorer. Renaissance revives the buffing response of your finish without the build up and yellowing associated with other restorers, thereby increasing the longevity of your finished surface.

**Grand Slam! Pro Stripper** – Do it right the first time with Grand Slam! Pro Stripper. Grand Slam! Pro is designed to remove all the old finish and sealer on your floor rapidly and completely, saving you valuable time and money.

In addition to products and floor care systems, Brandalan provides a variety of support services and literature. Brandalan has a number of training programs designed to inform its customers on subjects such as the proper use of its products and how to develop a cost effective floor care program.

### EPA 2000

**E**PA 2000 is a non-hazardous, non-toxic, evaporative safety solvent for the cleaning of mechanical and electrical equipment, tools and parts, and is an environmentally sensitive replacement for 1-1-1 Trichloro-ethane. Formulated to meet RCRA regulations established by the EPA for industrial waste minimization programs, it is non-hazardous, and can be burned on site as boiler fuel, or combined with spent hydraulic fluids and lube oils and recycled. All ingredients are approved under the (EPA) SNAP (Significant New Alternatives Policy) Program. EPA 2000 is approved as "incinerateable" for "mixed waste" by the nuclear plants by GTS Duratek (Oak Ridge, TN) under the Federal Compliance Agreement of the Department of Energy. It is approved by the nuclear divisions of Combustion Engineering, General Electric and Westinghouse for Class A, B, and C grade cleaning applications, and for the cleaning of safety related equipment in the Primary System. EPA 2000 has no toxic vapors, is non-conductive to 41 KV, displaces moisture, is 100% volatile, and complies with all air quality standards. For use in all parts cleaning machines. Can be used at room temperature or can be heated up to 110 degrees C. Equipment or parts can be sprayed, immersed, brushed, or wiped clean.

### AMERICAN HOTEL REGISTER COMPANY PARTNERS WITH GSA

*American Hotel Register Company*, the largest distributor of lodging and hospitality supplies and services in the industry, is thrilled to announce its recent award of GSA's Point of Sale/Catalog Ordering Contract. With this new contract, GSA brings to its customers the most comprehensive package of lodging and hospitality supplies, equipment and services available anywhere.

*American Hotel's* 2,200-page Catalog, under contract # GS-O7F-0294K, contains over 37,000 of the items used by lodging and hospitality activities — linens, towels, amenities, appliances, furniture, cleaning supplies, "Room in a Box" — everything, all in one catalog. Truly "One-Stop-Shopping".

We're organized around the government customer, large and small, and are expert in selling to you. For over 25 years, *American* has operated a Government Sales Department, staffed with government sales experts with over 80 years combined experience who serve government customers only. They are trained in all facets of doing business with the government: funding, logistics, transportation — domestic and overseas, customer service and billing.

A call to *American Hotel's* Government Sales is the same as calling another government agency — no explanations about who you are, or why you're calling — just place your order. We accept all government credit cards and will quote prepaid freight pricing on an order-by-order basis. Our seven Distribution Centers, strategically placed throughout the United States ensure prompt service wherever you are located.

Call, Fax or Email us. By September, *American* will be on *GSA Advantage!* for E-commerce. There's no other lodging and hospitality supplier that has it all for the government customer. We are committed to fulfilling your needs with the full range of supplies, services, government expertise and experience and ease of doing business.

**SWEEPING COMPOUND**

As America's largest manufacturer of sweeping compound, Frantz Company is proud to offer a full product line of various compounds for any type of application. All our sweeping compounds are of the finest quality, providing excellent dust and dirt absorbency, and smooth, easy sweeping. Just as important, each of our sweeping compounds is especially formulated to be completely safe on their designated flooring surfaces. Using the wrong compound could damage the floor's finish so each carton or drum is clearly labeled as to its correct usage.

Our compounds are brightly colored for high visibility and easy miss-free sweeping. They can actually protect the person sweeping from breathing germ-filled dust by providing a virtually dust-free sweeping environment. Now, anywhere you sweep you can eliminate dusting, protect the sweeper and get cleaner, more attractive floors.

The following sweeping compound products are currently available:

Sand Base: Our most popular general purpose sweeping compound. Made from oil, sand, and a selected sawdust formula to provide excellent cleaning on coarser types of floors. Available in 50 lb., 100 lb., and 300 lb. containers.

Oil Base: This oil base compound is sand free and will not scratch finely finished floors. Available in 50 lb., 100 lb., and 200 lb. containers.

Wax Base: Free from oil, sand and water, this compound is recommended for all fine finishes. Won't spot, scratch or stain. Recommended for use on rubber and asphalt tile, linoleum, and waxed floor finishes. Available in 75 lb., 150 lb., and 200 lb., containers.

## New Award Under Federal Supply Schedule 66 II Q Geophysical, Environmental Analysis Equipment and Services

### DCR-1 AND DST PROGRAMMABLE SENSOR SYSTEM

Lundahl Instruments, Inc., manufactures liquid level measuring instruments, related accessories and options. The DCR and DST systems are unique in that they are easily programmed to operate in most applications and environments.

The DCR-1 Sensor System is a programmable controller and distance readout for use with the DST model ultrasonic sensor head. It has a built in LCD display and 33 microprocessor controlled modes.

The DCR-1 controller has 4NPN trip point outputs. It also has a 4-20mA output, as well as the 4 NPN trip points. The DCR sensor system is powered by 12-24 volts DC, and was designed to be used where the electronic controls and display need to be removed from the sensor and sensing environment. The DST remote sensor head is available with either an electrostatic transducer for high accuracy in dry environments

(DST-E), or a ceramic transducer for use in high condensate and harsh environments (DST-C & DST-M).

Geophysical, Environmental Analysis Equipment and Services**

**SURVEYING EQUIPMENT**

Used in surveying, construction, and land development, the new Sokkia SET500 combines the latest electronic technology and software enhancements in a rugged, lightweight design. Distance measurements through the miniaturized EDM take less than 3 seconds and can measure more than a mile to a single prism. The SET500 can also measure to reflective sheet targets when it is not convenient to use a prism. Complete your job quickly and easily with software enhancements that include functions such as job management, feature code listing, offset observation, area calculation and a bull's-eye leveling indicator. Additionally, the internal data storage of 4000 points and an option for a memory card offers the flexibility to meet the needs of any application.

You can order this item on-line through **GSA Advantage!** at [www.fss.gsa.gov](http://www.fss.gsa.gov).
